Trenvo: Churn Analysis Report

Understanding the relationship between user acquisition, engagement, and churn — and their impact on revenue.

Made with GAMMA

Key Metrics at a Glance

169K

Active Subscribers

$62.39K

Average Monthly Recurring Revenue (MRR)

$47.17

Average Life Time Value (LTV)

North Star Metrics: **Revenue Performance** · **Customer Retention** · **User Engagement**

Made with GAMMA

The Core Objective

Mission

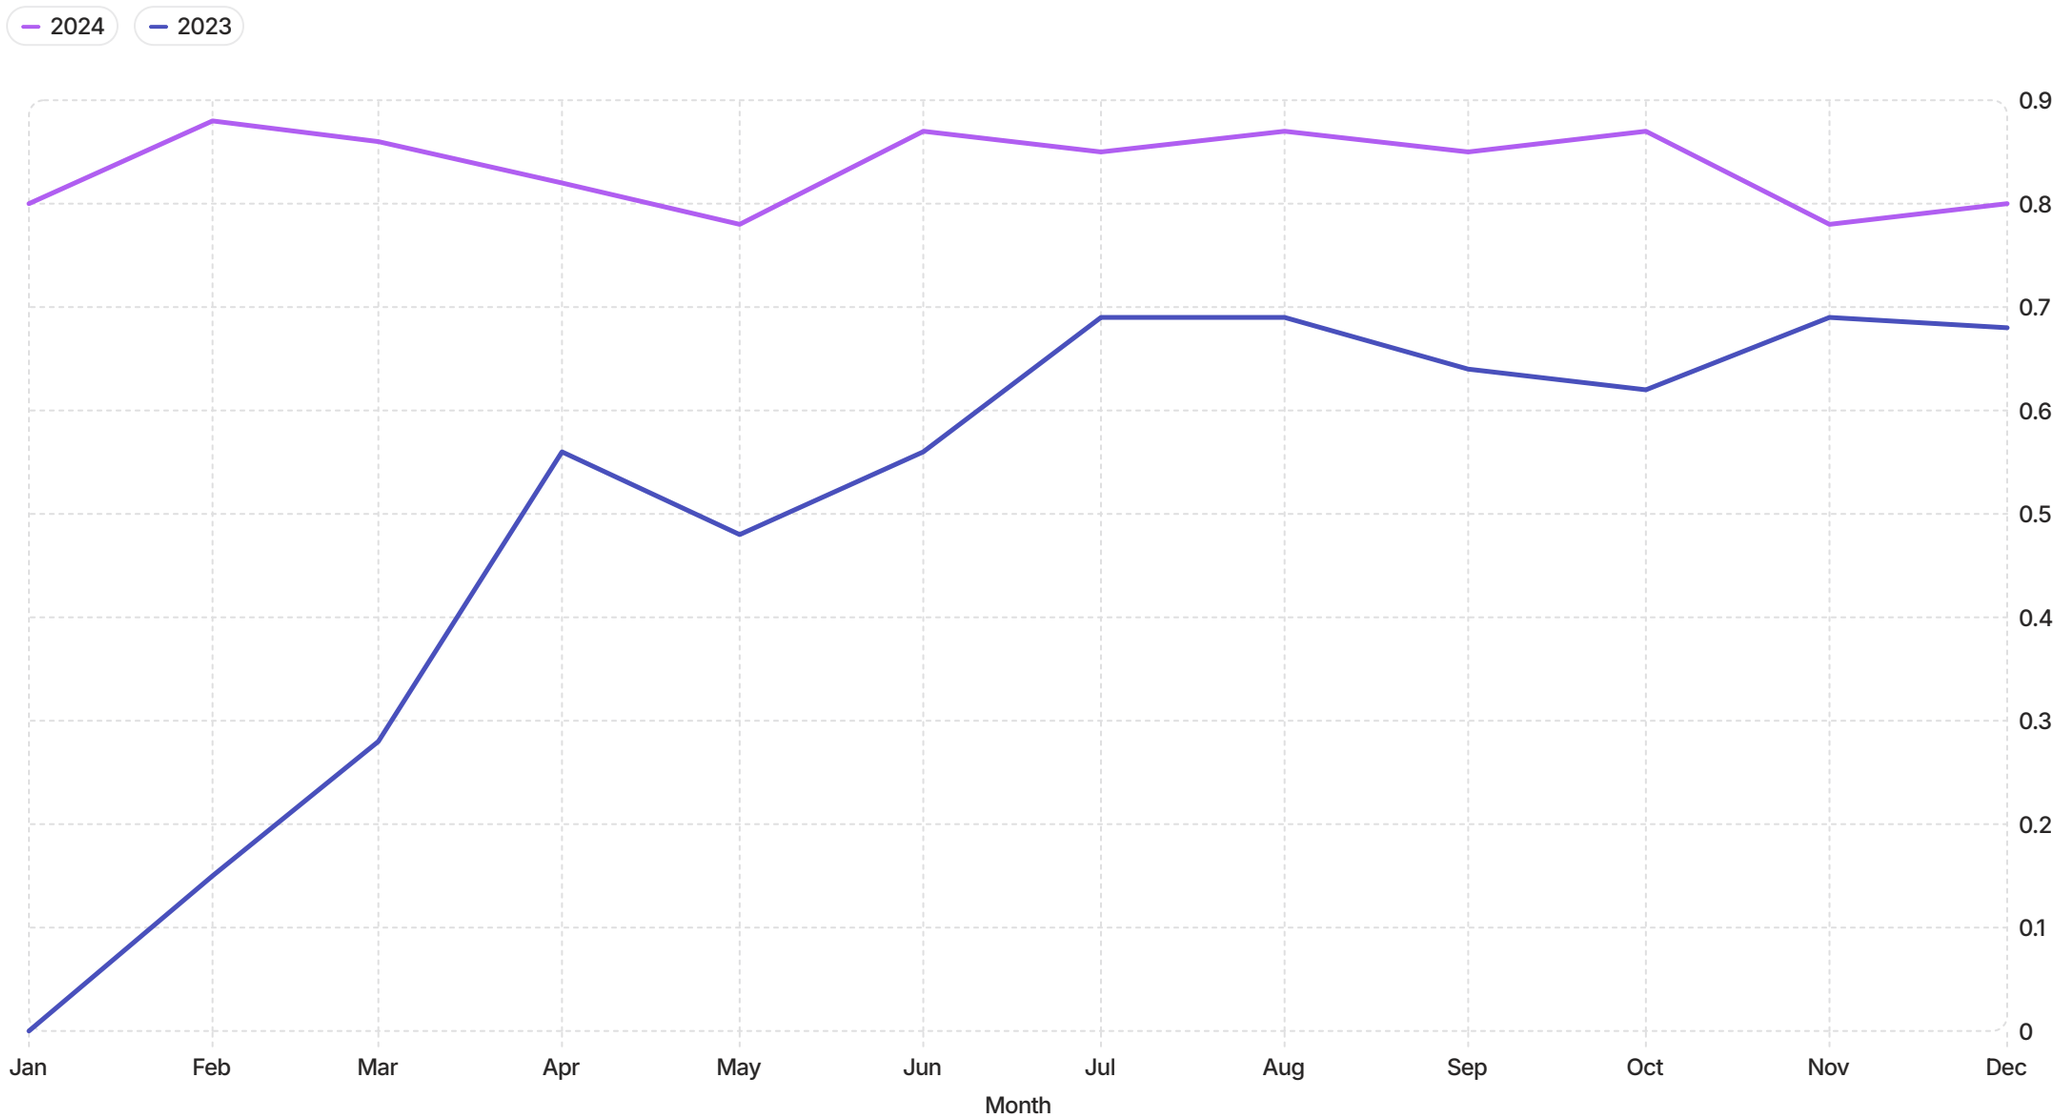
Identify the most likely reason users churn — and determine the best solution.

Key Insight

Churn is driven by **low user engagement**, not acquisition channel — despite uniform LTV across all channels.

Made with GAMMA

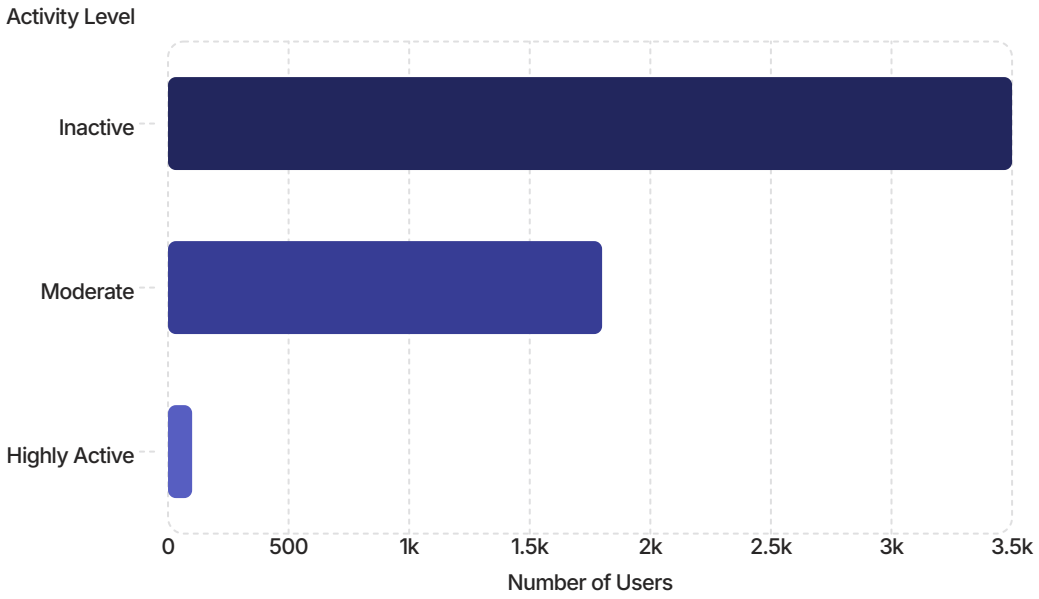
Churn Rate: 2023 vs 2024



Churn surged from **~67% (2023)** to **~85% (2024)** — signaling serious retention and revenue instability.

Made with GAMMA

Root Cause: Inactivity Before Cancellation



The Pattern

(3.5K users)62–68% of users were inactive in the 30 days prior to canceling.

This pattern is **consistent across all acquisition channels**.

Paid & referral channels show higher churn among highly active users (~1.4%) — possible unmet expectations or product gaps.

Made with GAMMA

Critical Churn Spike: June 2024

2023 June

Steady growth in MAU

2024 June

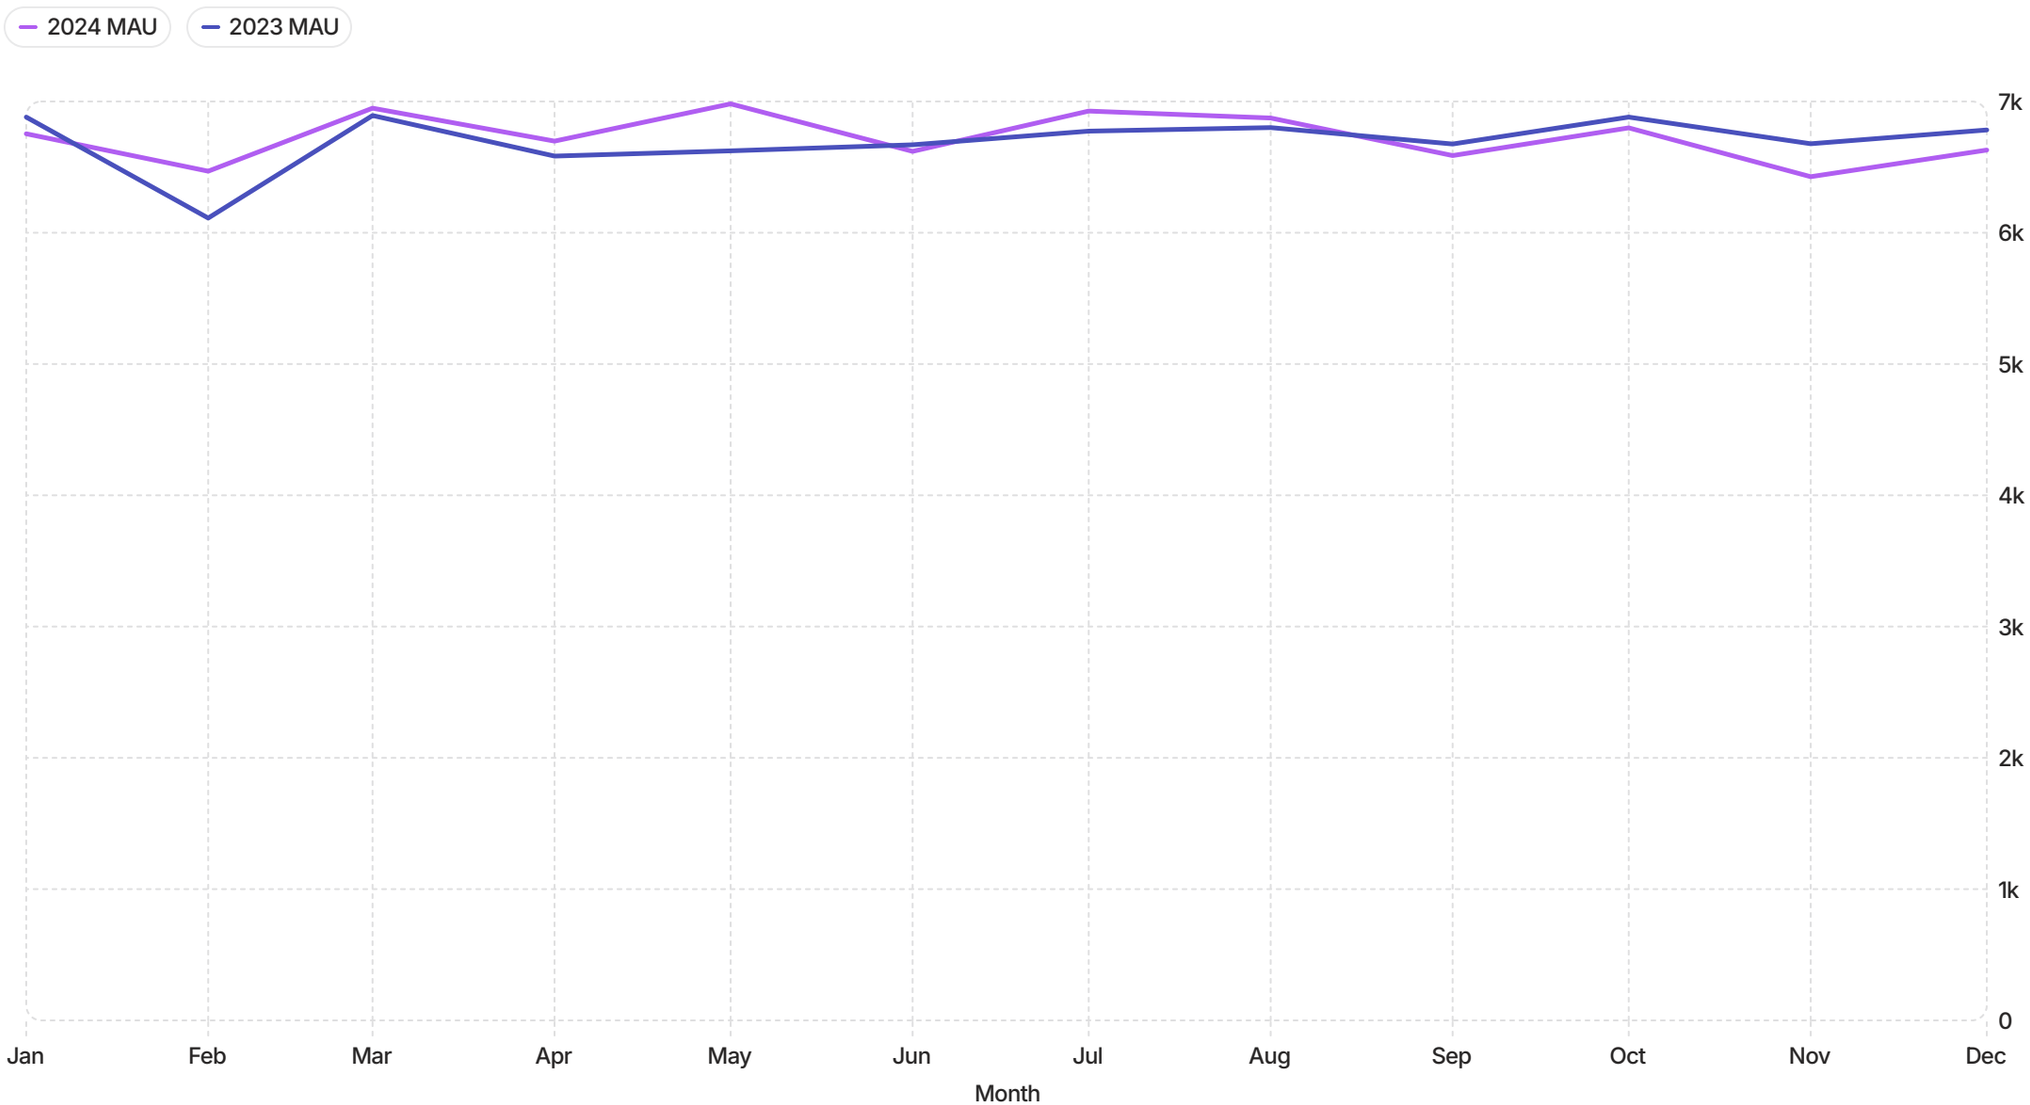
Significant churn spike & engagement volatility

Likely Triggers

Product change, pricing shift, or UX friction

Made with GAMMA

Monthly Active Users: 2023 vs 2024



2024 MAU consistently higher than 2023 — yet churn is dramatically worse, confirming engagement quality is the issue, not volume.

Made with GAMMA

Recommendations

1

Early User Activation

Track activity in first 7 days.
Implement onboarding walkthrough.
Goal: reach "value moment" faster.

2

Engagement Retention System

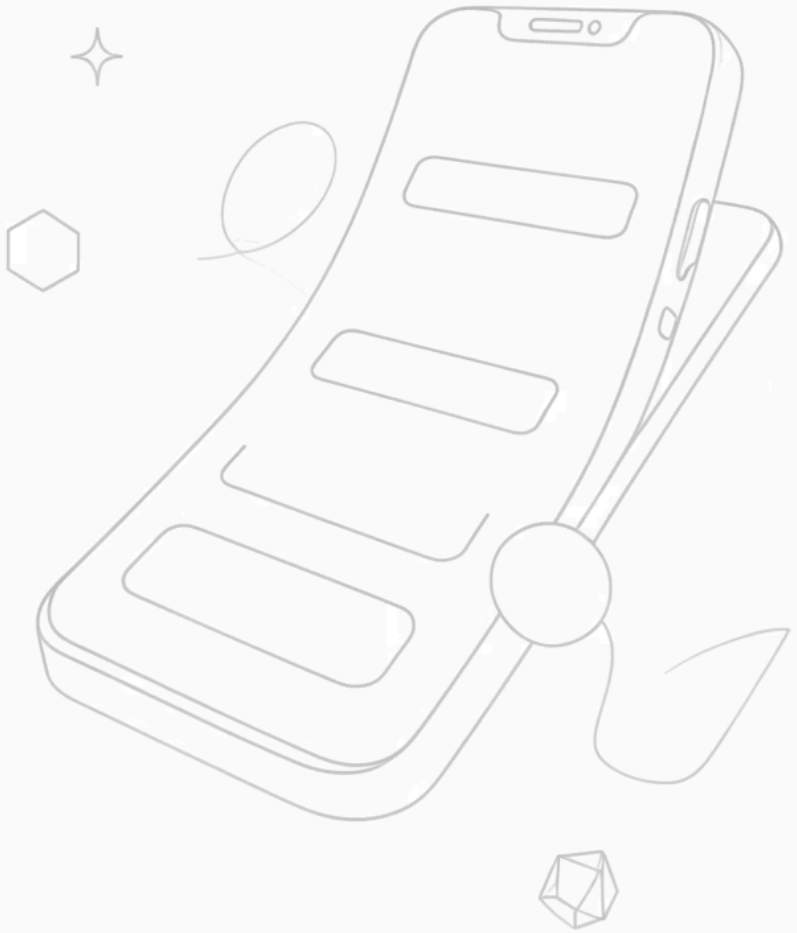
Inactivity alerts at 7 & 14 days.
Intervene with email/SMS nudges, feature reminders, and promotions.

3

Investigate Feb & June Spikes

Survey churned active users.
Analyze product/UX friction points.
Goal: retain high-value users, increase LTV.

Made with GAMMA



The Path Forward

Activate

Drive users to value in 7 days

Engage

Re-engage before inactivity becomes churn

Retain

Reduce pre-churn inactivity & protect LTV
